When you're interested in becoming a web developer, it's easy to get tripped up on where to start. Let me make it super easy for you—start with JavaScript! Read on to find out why JS is such an ideal programming language to learn first.

The first programming language you should learn is...

What is the DOM? The DOM is a W3C (World Wide Web Consortium) standard. The DOM defines a standard for accessing documents: "The W3C Document Object Model (DOM) is a platform and language-neutral interface that allows programs and scripts to dynamically access and update the content, structure, and style of a document."

JavaScript HTML DOM - W3Schools

Java platform is a collection of programs that help to develop and run programs written in the Java programming language. Java platform includes an execution engine, a compiler, and a set of libraries.

What is Java Platform? Ultimate Guide for Programmers
