The above code specifies a red oval inscribed in a yellow rectangle. One of the most flexible of SVG's primitive objects is the path. <path> uses a series of lines, splines (either cubic or quadratic), and elliptical arcs to define arbitrarily complex curves that combine smooth or jagged transitions.

The Greeter class is a React component that accepts a property greeting. The ReactDOM.render method creates an instance of the Greeter component, sets the greeting property to 'Hello World' and inserts the rendered component as a child element to the DOM element with id myReactApp.

React (JavaScript library) - Wikipedia

There are two interrelated concepts with prototype in JavaScript: First, every JavaScript function has a prototype property (this property is empty by default), and you attach properties and methods on this prototype property when you want to implement inheritance.
