A urinary tract infection (UTI) is an infection involving any part of the urinary system, including urethra, bladder, ureters, and kidney. UTIs are the most common type of healthcare-associated infection reported to the National Healthcare Safety Network (NHSN).

Catheter-associated Urinary Tract Infections (CAUTI) | HAI

A urinary tract infection (UTI) is an infection that affects part of the urinary tract. When it affects the lower urinary tract it is known as a bladder infection (cystitis) and when it affects the upper urinary tract it is known as kidney infection (pyelonephritis). Symptoms from a lower urinary tract include pain with urination, frequent ...

Urinary catheters have been used since the third century B.C., by the Greeks, Egyptians and Chinese, but the first malleable urinary catheter on record was only made in 1779 by a goldsmith, Bernard . Some of the first materials used to make urinary catheters were copper, tin, bronze, gold, lead, papyrus, onion stems, dried reeds and palm leaves.
