### **Use Fractions To Multiply | Download eBook PDF/EPUB**

Equivalent fractions can be found for any fraction by multiplying the top number and the bottom number by the same number. For example, if we have  $\frac{3}{4}$ , then multiplying by 2 gives  $\frac{3 \times 2}{4 \times 2} = \frac{6}{8}$ , or by 3 gives  $\frac{3 \times 3}{4 \times 3} = \frac{9}{12}$ . Multiplying by 10 gives  $\frac{3 \times 10}{4 \times 10} = \frac{30}{40}$ , and all of these fractions are exactly the same as  $\frac{3}{4}$ .

Mixed Numbers A “mixed” number is one that is part whole number and part fraction.  $3\frac{2}{5}$ ,  $11\frac{8}{5}$ ,  $4\frac{2}{3}$  are samples of mixed numbers. Mixed numbers have to be written as fractions only if you’re going to multiply or divide them or use them as multipliers or divisors in fraction problems.
