The Science of Why We Don't Believe Science – Mother Jones

In the psychology of human behavior, denialism is a person's choice to deny reality, as a way to avoid a psychologically uncomfortable truth. Denialism is an essentially irrational action that withholds the validation of a historical experience or event, when a person refuses to accept an empirically verifiable reality. In the sciences ...

Denialism - Wikipedia

During the last decades the refusal of vaccination is increasing. • There is lowest vaccination coverage in countries with anti-vaccination campaigns.

The truth about carbon dioxide Again, CO2 is not, and has never been, a poison . Each of our exhalations, each of our breaths, emits an astronomical quantity of CO2 proportionate to that in the atmosphere (some >40,000 ppm); and it is very clear that the air we expire does not kill anyone standing in front of us.
