Fourth view in this by now, four part series. ———— ————Please consider donating to support my work. I put a lot of time and effort into researching, studying and producing my videos so that you can learn how quickly our world is changing.

Paul Beckwith, Climate System Scientist | Abrupt Climate

The Grinnell is perhaps the most iconic of two dozen named glaciers in the Park. Untold thousands of people have hiked to it. Millions more have been exposed to government imagery of the Glacier melting away.

Are the glaciers in Glacier National Park growing? | Watts

Hi, What they are spraying with chem trails is 'aluminum, 'barium' and 'strontium' dust in the name of climate control. But the real truth is that aluminum is dangerous to trees and plants growing in the Pacific NW and most of Eastern US.

Dying Of The Trees, The Climate Engineering Nightmare

Essays and research supporting the idea that global warming poses a clear threat to humanity, that it is largely caused by human activity, and that solutions to the problems of climate change lie within human reach.
