Forest plantations are the topic of Chapter 8, followed by floodplain and swamp forests (Chapter 9), forest epiphytic vegetation (Chapter 10), and the scrub vegetation of forest edges and hedges (Chapter 11). The summarising chapter (12) gives an overview of the most important plant communities of Central Europe.

### **Vegetation Ecology of Central Europe - Google Books**

This is the first English language edition of a well-balanced far reaching study of the vegetation of central Europe. Principles relevant to ecologists and palaeoecologists in the British Isles and in North America as well as plant ecologists in Central Europe are discussed. Syntheses of the major plant communities are provided. The ecology and ...
